

## HERESY CHARGES AGAINST BROWNS NOT SUSTAINED

Presbyterian General Assembly's Committee Upholds New York Ministers.

ARE NOT UNORTHODOX.

Split Over Dr. Grant's Case Is Reported Probable—No Decision Yet.

*(Special to The Evening World.)*  
*(Special to The Evening World.)*  
ATLANTIC CITY, N. J., May 25.—One of the sensations of the Presbyterian General Assembly fell flat today when the heresy charges against president Francis Brown and Prof. William Adams Brown of Union Theological Seminary of New York were dropped.

The committee on bills and overtures reported that the articles written by these clergymen have nothing in them that is unorthodox, and therefore recommended that the cœurs of the presbyteries of Iowa and West Jersey asking that the browns be investigated for galloped heretic utterances should be dropped.

The assembly voted to sustain the attitude of the committee. There was no discussion.

Rumors of a disagreement among the members of the Committee over the case of the Rev. Dr. William D. Grant, Northumberland, Pa., clergymen also charged with heresy, were current about the General Presbyterian Assembly today.

A verdict was looked for last night, which gives evidence that the committee is disinclined to allow the plea of the leaders of the Assembly to withhold announcement of its decision until the last hour of the shore convocation, to prevent a demonstration on the floor of the convention. The committee is still in session.

It was reported at 1 o'clock that the verdict would be returned some time this afternoon.

Personal solicitation for a berth on the Executive Commission came in for a warm greeting from Elder Thomas Kane of Chicago this morning. He also took a fling at the supporters of various candidates in importuning help for their commissioners.

### Attacks Place Hunters.

"To move that the Judicial Committee be instructed to throw out the name of any man as nominee for a place on the Executive Commission who has either solicited the position himself or through his friends," was the demand of the big Chicago man. A perfect storm of applause drowned the voices and gave plaudits to Moderator Carson.

"That motion is out of order," shouted Dr. Carson, when the wave of enthusiasm had subsided. "No motion is in order that casts reflection on the twenty-one honored men of the Assembly."

Despite the Moderator's ruling another motion was put demanding the whole matter be referred back to the committee.

Then the Rev. Dr. S. Edward Young, chairman of the Judicial Committee and one of the big men of the New York delegation, sprang to the front of the platform.

"Are we to put every man who is named as nominee for the commission out of order to discover whether he sought the position?" he quipped.

Shouts of "No!" came from his delegation. The rumpus finally quieted down and the election of Thomas McCurdy of Philadelphia, Andrew Steersman of Chicago, Jessie Foster of New York and Judge Freeman of Illinois, who had been suggested for the committee, confirmed.

Among the members whose terms expire and are therefore ineligible for future service on the Executive Commission are the Rev. James Moffatt, President of the Central College of Missouri, known among his friends as "The Diplomat of Show Me," and whose guidance and ability as an organizer were responsible for the great work of the committee; and the Rev. William H. Black, also of Missouri, who was the father of the consolidation of the board scheme.

### Upholds Temperance Work.

His eloquence stilled dissension and apparently saved the day for the federation plan framed by the committee when it secured provisional adoption last Saturday.

Efforts of the Otago Presbytery to secure abolition of the Assembly Temperance Committee, located in Pittsburgh, on the ground that it was a needless expense and impractical in its work, was defeated by the motion of the Committee on Bills and Overtures, which asked that the Otago overture be put on the table and carried its point.

The looked for conflict over the adoption of the proposed intermediate calendar was prevented by the action of the assembly in referring the whole scheme back to the committee to be reported again next year.

### TAFT TO BE AT BULL RUN.

Tentatively Accepts Invitation of Rival Army Veterans.

WASHINGTON, May 25.—President Taft to-day tentatively accepted an invitation to attend a reunion of veterans of the Union and Confederate armies at Manassas, Va., July 25, the fifth anniversary of the first battle of Bull Run.

President Taft also accepted tentatively to-day invitations to speak on reciprocity before the Chamber Club of New York at Manhattan Beach, New York, June 22, and to attend the centennial celebration of the founding of Fort Harrison, Ind., near Terre Haute, some time in September.

### MINISTER ON TRIAL FOR ALLEGED HERESY IN BIBLE TEACHING.

W.M.D. GRANT JR.

## TO CLEAN STREETS RAISING NO DUST; WON'T IT BE FINE?

Board of Estimate Authorizes Commissioner Edwards to Use Pneumatic System.

The streets of New York are to be cleaned pneumatically—not by the winds, but by mechanically driven and operated machines which suck up all surface dirt. This is due to the action of the Board of Estimate to-day in authorizing the Street-Cleaning Commissioners to enter into a contract with the Emerson Contracting Company, which manufactures the pneumatic type of machine.

A committee of the Board has been making experiments with all classes of street-cleaning devices, including fluming machines, and reported favorably on the pneumatic method. In its report the committee says:

Your committee had a series of tests made under its supervision by the Emerson Contracting Company, the manufacturers of a machine which cleans the streets dry or with a very small quantity of water.

The sweepings from the broom reach conveyor which mechanically transports the dirt to the body of the machine, and all dust is avoided by means of a slight suction which is maintained in the hood.

The Emerson Company will rent a number of machines to the city for a period of six months. A contract will be made for the rental of each machine to clean 1,000 square yards of 1,000 square yards each between now and Dec. 31 next. The price is at the rate of forty-eight cents for each 1,000 square yards of cleaning.

Commissioner Edwards wanted \$10,000 to cover the cost of cleaning under the Emerson process as well as by the use of the present methods. In view of the shortage of water the committee advised that the pneumatic machines alone be used. An appropriation of \$30,000 will be needed. In Brooklyn the Commissioners will employ fluming machines and use for their hire the \$2,000 allowed him in the 1911 budget.
